- Load capacity: 600 lbs.
- 48"W x 84"L x 18"H
- Durable aluminum construction
- Tough powder coat finish
- 2" High density foam
- Wall mounting plate
- ADA Compliant

WHY CHOOSE ALUMA ELITE?

Our Aluma Elite products are made from high-grade aluminum, known for its exceptional strength-to-weight ratio, ensuring the equipment is both robust and lightweight, making it durable and easy to handle. Aluminum's natural resistance to corrosion means our products can withstand harsh environments and heavy use without rusting or degrading over time, making them ideal for both indoor and outdoor use. The lightweight nature of aluminum also makes our products highly portable and easy to move around, which is especially beneficial for equipment that needs to be frequently relocated or transported. With years of experience and a solid reputation in the industry, our Aluma Elite series stands for high quality and reliability.

ALUMA ELITE MODALITY CARTS

The Aluma Elite Modality Carts are constructed of durable aluminum and are offered in multiple configurations to suit your storage needs. Features include a tough powder coat finish, drawer and door key locks, electrical grommets for easy cord routing, and 2" non-marking casters. Customize your modality cart for your school, team or organization with a custom graphic, included on every cart.

- Load capacity: 500 lbs.
- Durable aluminum construction
- Tough powder coat finish
- Aluminum top with electrical grommet for easy cord routing
- 7" Drawer(s)
- Drawer/Door key locks
- 2" Non-marking casters with brakes

FORNEY HIGH SCHOOL CASE STUDY

CREATING A GAME-CHANGING SPACE FOR STUDENT ATHLETES

When Forney High School set out to build their new fieldhouse, Head Athletic Trainer Richard English, M.Ed, LAT, ATC, had a clear vision for the athletic training room: it needed to be efficient, accessible, and fully equipped to meet the demands of both immediate care and ongoing rehabilitation for their athletes. With over 1,400 students actively involved in their programs and multiple large athletic events throughout the year, every detail of the space had to be purposeful. *"The equipment is top of the line and has been a game changer for our athletes,"* Richard shared. From start to finish, the goal was to design a high-functioning clinical environment where athletic trainers could work efficiently while keeping athlete care front and center.

THOUGHTFUL DESIGN, SEAMLESS FLOW, AND PURPOSEFUL EQUIPMENT

The project began by adjusting the initial floorplan to improve traffic flow and maximize usable square footage. Door access was added to both sides of the building, and equipment placement was carefully considered to create an intuitive, open layout.

Richard explained, “We wanted equipment such as the LAST tables to be able to properly position athletes for hands-on therapy sessions, and cabinetry to organize supplies without cluttering the room.” Key features like a three-section taping station, four-station treatment section, modality carts, and mobile high/low workstations were strategically placed to enhance functionality and accessibility. Stress-relief floor mats were incorporated throughout to help prevent fatigue for the athletic training staff during long treatment days.

PERFORMANCE UNDER PRESSURE

The true test of the new facility came during large athletic events like soccer, baseball, and softball tournaments, and multiple track meets. The training room was able to serve 60–80 athletes at any given time, handling everything from preventative taping and bracing to wound care management and rehab sessions. An outdoor exam and treatment area was also set up on the patio, ensuring the athletic training team could manage care on the move.

“The Athletic Edge equipment has helped create an environment of efficiency and effectiveness without creating additional labor tasks,” said Richard. The mobile workstations proved especially valuable, allowing the team to document care and manage records while actively working with athletes — improving both operational flow and personal wellness for the staff.

A FACILITY BUILT FOR THE FUTURE

For Richard, seeing the vision come to life was unforgettable. “To actually see the finished project was electrifying. I felt the hair on the back of my hand want to stand up and a chill went down my back knowing this facility was ready, and the students were going to be better off by it.”

His advice for other athletic trainers planning new facilities: “Make a running list of notes — the pros, cons, likes, and dislikes — and listen to the people actively working in those spaces. Learn from the past so you can plan for the future.”

In a competitive market of equipment options, Richard was confident in his choice. “While there are a lot of choices on the market, I found the Athletic Edge equipment to be durable, easy to use and maintain, and a good quality for the buck. The Athletic Edge equipment exceeds my expectations of functionality and looks great.”

8 TOP CONFIGURATIONS

LEG & SHOULDER THERAPY (LAST) TABLE

US PATENT NO. 10,857,052

Ergonomically designed, the Leg & Shoulder Therapy (LAST™) Table with hi-lo elevating base is the first treatment/exercise table that supports bilateral training and specific anatomical positioning to achieve the desired results for both professional athletes and weekend warriors. The elevating base ensures that even athletes with limited mobility have easy access in any setting. To maximize your efforts as physical therapists, athletic trainers and clinicians, the LAST table is a must for your rehabilitation practice or training rooms.

See website for more details.

ET TREATMENT CABINET

The ET Treatment Cabinet sets the standard in functionality, ease of use, storage and convenience. With an easy-to-operate adjustable height ranging from 29" to 44", and the numerous cabinet and top options, this cabinet serves most athletic trainers' needs.

The cushion can be upgraded to include 70° lift back and 30° split leg options on the cushion top, and you can upgrade the cabinet configuration to include storage on one or two sides.

Enhance your room by adding one of our custom branding options on the cushion or cabinet.

See website for more details

ME2000 ELEVATING TREATMENT TABLE

The ME2000 Elevating Treatment Table is a durable, yet handsome elevating table perfect to add versatility to your treatment space. The sleek white powder coat steel base and the two sliding doors on each side of the table give a polished and sophisticated look while providing storage.

The height range from 24" to 36" gives athletes easy access to the table at the press of the foot pedal.

*Table shown with options

PT2000 BARIATRIC HI-LO MAT TABLE

The PT2000 Bariatric Hi-Lo Mat Table is ideal for the rehabilitation setting and is available in a range of sizes to provide your facility with the option of delivering optimum care for larger patients.

The table features 18-33" height range, single foot control, 1.5" high density foam flat, seamless cushion and convenient drop down casters.

*Table shown with options

MODULAR TAPING STATIONS

With our full line of modular taping stations, you can custom design and brand your athletic training room with exclusive options you will not find anywhere else. The modular taping stations offer flexibility for the design of your space. From individual taping seats and cabinets to 5 seat taping stations, the configuration options are endless. All taping stations are solidly constructed and fully finished, with several laminate and wood options available.

The Athletic Edge's custom branding creates a lasting impression and positive image for your team and serves as a great recruiting tool. We have the perfect, cost-effective solutions for your branding needs.

- Load capacity: 450 lbs. per seat

NEW!

RECOVERY COUCH

The Recovery Couch offers durability, comfort, and easy maintenance—ideal for clinics, rehab centers, and athletic facilities. It supports up to 400 lbs. and features a spacious 27" x 72" surface at a 19.5" height. Designed for convenience, it includes a paper holder and cutter, a 27" x 21" x 4" bolster, and 2" high-density foam for firm, comfortable support.

Comes with either steel tube or maple hardwood legs.

WANT TO KNOW MORE ABOUT LOCKERS?

Athletic Edge lockers are specialized storage units designed to meet the needs of athletes, sports teams, and recreational facilities. Built from high-quality materials such as aluminum, wood, laminate, or phenolic, they are designed to withstand heavy use and resist damage. Key features include ventilation holes or mesh panels to promote airflow and prevent odors, secure locking mechanisms, and various compartments, shelves, and hooks for organizing equipment and personal items. Athletic Edge lockers can be branded with team logos, names, or numbers, and some models include additional amenities like power outlets or USB ports. Available in multiple sizes, colors, and configurations, Athletic Edge lockers provide practical storage solutions that enhance organization, security, and convenience for athletes and team members in schools, universities, professional sports teams, and recreational facilities.

SPLINT BATHS & CARTS

STRAVA BASIC

The Strava Basic Splint Bath offers innovative features and modern looks with an economy price. Made of a thermoset material, known for its insulation, flammability, resistance and durability. Features a stainless steel hinged bi-fold lid for easy access from three sides.

Rev. 24/7

WORKSPACE REINVENTED

www.Rev-247.com

Our mission hasn't. Our focus is on the way you work best, and we provide the resources you need to get work done. We created REV.247 to provide innovative products and solutions to help reinvent your workspace. How you work is just as important as the work you do. REV.247 provides creative products and options to help reinvent your workspace by focusing on how, where, and when you work to optimize your unique work habits. It's all about getting things done.

Based in Watertown, South Dakota, Pivotal Health Solutions serves as an industry-leading manufacturer of healthcare and wellness products, and our mission is to develop innovative furniture and equipment solutions that make a difference in the markets we serve. REV247 proudly creates; Elevating Desks, Office Chairs, Stationary Tables and Mobile Workstations!

Custom CRAFTWORKS®

Custom Craftworks is currently based out of Pivotal Health Solution's Springfield, OR location. Innovation continues to be the company's hallmark as Custom Craftworks was the first in the industry to design and build custom tables with breast recesses, as well as its one-of-a-kind prenatal tables. Very specific thought goes into every Custom Craftworks design, from the thickness of the wood to the choice of source materials that are both strong and flexible enough to accommodate all shapes and sizes.

Armedica[®]
BY PIVOTAL HEALTH SOLUTIONS

By keeping all facets of design, manufacturing and service within one operation, Armedica can control and fine-tune each step of the manufacturing process. This means that we are able to assure the quality of our products as we build them and provide a better value for you.

The very first table manufactured by Armedica is still being used regularly to treat patients!

Armedica employees, who have hands-on product knowledge, solve problems and provide a quick response to service questions. Since they work here at the manufacturing facility, they have easy access to valuable resources to help troubleshoot and solve problems. We also stock replacement parts in our warehouse in Arkansas so they are normally available to ship when needed.
