IN THE BOX:

(1) Weight Rack

(4) Washers

(4) Screws

Weight Rack (Front View)

Weight Rack Hanging Instructions

Unpack weight rack, washers and screws from box. Use a stud finder to locate a stud in the wall.

Line weight rack up on the wall where the stud was located and use a marker or pencil to mark the center of the hole.

Drill four small pilot holes on the locations you marked with a 7/32in drill bit.

Line up the holes in the weight rack with the pre-drilled holes. Using a 7/16in wrench or socket drive bit, install the screws and washers provided into the pre-drilled holes. One screw and washer per-hole. Repeat this process for all four holes.

Your Weight Rack is now ready for use.

*Note: Routinely check weight rack to make sure all hardware is tight and tighten accordingly when necessary.
